COVID-19 compliance and safety update

With one of our productions entering the shooting stage soon, we're taking necessary precautions to prevent the spread and keep our staff, cast and crew safe, including proactive sanitation, mask mandate enforcement and contact tracing.

In compliance with our county and city's COVID-19 policies, all on-site personnel are required to keep their vaccination card with them at all times to confirm vaccination status at a number of locations that we plan to shoot at.

Non-essential personnel are strongly encouraged to work from home. We're providing multiple options for them, including virtual machines provided by Amazon Web Services to allow them to gain the power they need, no matter what computer they have. We're now preparing an image for them to use to ensure security and ease of use.

We are fully prepared and willing to halt production if cases do not fall by January 20 (a little over a week before production initiates).

Colin Cabana - Chief Executive Officer of Xythreon
